01 / LAUNCH KIT

Give the launch one clear job.

CHANNEL REGISTER

email / draft

DELIVERY BOUNDARY

3 proposed placements; no sends or results supplied.

Figure 1 / fictional illustration, not evidence / curated image source in provenance.json

Keep the thought beside the note. Fold Notes is a fictional concept for returning to a saved idea without losing the question that made it useful.

The launch job is explanation, not a promise of productivity. Invite a reader to inspect the concept and decide whether the proposed interaction fits a real task.

One message, not every benefit

Proposed primary action: review the concept outline. No live destination, product access or release date is supplied.

CHANNEL MESSAGE / DRAFT COPY

Message

Keep the thought beside the note.

Desired action

Review the concept outline; destination to be confirmed.

Success question

Did the explanation make the proposed task clear?

Can a reader explain the concept after one short encounter?

02 / LAUNCH KIT

Write for a task, not a stereotype.

CHANNEL REGISTER

social / draft

DELIVERY BOUNDARY

3 proposed placements; no sends or results supplied.

Figure 1 / fictional illustration, not evidence / curated image source in provenance.json

The intended reader returns to saved material while writing, teaching or planning. The task matters more than an assumed age, title or purchasing habit.

Separate a returning reader, a first-time reviewer and an organisational evaluator. These are planning lenses, not researched segments or confirmed demand.

Three distinct entry points

Ask each reader what they need to understand before adapting a headline. Do not infer that task similarity establishes willingness to pay.

CHANNEL MESSAGE / DRAFT COPY

Returning reader

Why did I save this note?

First-time reviewer

What is the proposed interaction?

Evaluator

What evidence would support using this approach?

Which reader question should this channel answer first?

03 / LAUNCH KIT

Build a message spine.

CHANNEL REGISTER

landing-page / draft

DELIVERY BOUNDARY

3 proposed placements; no sends or results supplied.

Figure 2 / fictional illustration, not evidence / curated image source in provenance.json

Save a note with its question. Return to the context before turning it into a new explanation. That is the proposed Fold Notes workflow.

Use the same meaning across every channel. Shorter versions may remove detail, but must not upgrade a concept into a released feature or a measured customer benefit.

Message hierarchy

Lead with the task, explain the interaction, then state the next action. Keep qualifications next to the claim they constrain.

CHANNEL MESSAGE / DRAFT COPY

Task

Recover the reason a note was saved.

Proposed mechanism

Keep a note linked to its original question.

Qualification

Concept only; no working capability verified.

Does each adaptation preserve the same capability boundary?

04 / LAUNCH KIT

Choose headlines by emphasis.

CHANNEL REGISTER

email / draft

DELIVERY BOUNDARY

3 proposed placements; no sends or results supplied.

Figure 2 / fictional illustration, not evidence / curated image source in provenance.json

Keep the thought beside the note. A second route is: Return to the question, not just the quotation. A third is: Give a saved idea its context.

The three headlines emphasise proximity, retrieval and interpretation. They are editorial alternatives, not the winners of an audience test. Choose against the page purpose before seeking appropriate feedback.

Headline review

Avoid best, effortless and proven. None is supported by this fictional brief, and each could imply evidence the team does not have.

CHANNEL MESSAGE / DRAFT COPY

Route A

Keep the thought beside the note.

Route B

Return to the question, not just the quotation.

Route C

Give a saved idea its context.

Which headline best prepares the reader for the actual explanation?

05 / LAUNCH KIT

Explain the proposed interaction.

CHANNEL REGISTER

social / draft

DELIVERY BOUNDARY

3 proposed placements; no sends or results supplied.

Figure 3 / fictional illustration, not evidence / curated image source in provenance.json

A context card brings together a saved passage, the question that prompted it and a note about where it might be useful next.

The proposed workflow is capture, connect and revisit. Explain those steps as a design direction. Do not describe integrations, collaboration, security or offline operation as shipped features.

Short product description

Fold Notes explores a simple question: could preserving the reason for a note make later review more meaningful? A concept review should test that question.

CHANNEL MESSAGE / DRAFT COPY

Capture

Select material and retain its source context.

Connect

Associate the material with a working question.

Revisit

Review the connection before reusing the material.

Which part requires an actual demonstration before publication?

06 / LAUNCH KIT

Keep proof beside the claim.

CHANNEL REGISTER

landing-page / draft

DELIVERY BOUNDARY

3 proposed placements; no sends or results supplied.

Figure 3 / fictional illustration, not evidence / curated image source in provenance.json

The phrase designed to preserve context describes an intention. The phrase improves recall would describe an outcome and needs different evidence.

Maintain a claim register before publishing. Mark the concept statements as illustrative and outcome claims as unsupported. Copy approval is not scientific validation or permission to reuse someone else’s material.

Claim review boundary

Use the supplied source register as an authored exercise. Replace it only after checking the relevant product, evidence and rights information.

CHANNEL MESSAGE / DRAFT COPY

Allowed direction

A proposed way to keep notes with their questions.

Unsupported outcome

No recall or productivity result supplied.

Review requirement

Check capability, evidence and source rights separately.

What would a reasonable reader believe this sentence proves?

07 / LAUNCH KIT

Adapt meaning to the channel.

CHANNEL REGISTER

email / draft

DELIVERY BOUNDARY

3 proposed placements; no sends or results supplied.

Figure 4 / fictional illustration, not evidence / curated image source in provenance.json

Email: A saved note can lose its question. Explore the Fold Notes concept. Social: Keep the thought beside the note. Read the concept outline.

Landing-page copy has room to explain capture, connect and revisit. Neither short form should omit the concept status when that omission changes the reader's understanding.

Channel-specific draft copy

These are proposed copy routes, not sent messages. The channel register contains three planned placements with no delivery or audience measurements.

CHANNEL MESSAGE / DRAFT COPY

Email

Explore a concept for keeping notes in context.

Social

Keep the thought beside the note. Concept preview.

Landing page

Read the proposed workflow and its open questions.

What must remain visible even in the shortest version?

08 / LAUNCH KIT

Make the next action honest.

CHANNEL REGISTER

social / draft

DELIVERY BOUNDARY

3 proposed placements; no sends or results supplied.

Figure 4 / fictional illustration, not evidence / curated image source in provenance.json

Review the concept outline is more accurate than start now when no working product or public destination has been established.

Match the action to a real destination before release. Describe any requested information and its purpose. Do not imply enrolment, availability or a promised reply without an operational basis.

Action and destination check

A button label is not a functioning service. Verify the destination, accessible name, form behaviour and privacy notice in the actual publishing environment.

CHANNEL MESSAGE / DRAFT COPY

Primary action

Review the concept outline.

Destination status

No live destination supplied in this template.

Data request

No sign-up flow or collection permission established.

Can the destination fulfil exactly what the action promises?

09 / LAUNCH KIT

Review the release as a system.

CHANNEL REGISTER

landing-page / draft

DELIVERY BOUNDARY

3 proposed placements; no sends or results supplied.

Figure 5 / fictional illustration, not evidence / curated image source in provenance.json

Read the headline, description, qualification and next action together. A correct disclaimer cannot repair a misleading headline that the reader sees first.

Assign product, editorial and rights review separately. The source register leaves all three placements at draft status. No reviewer or release authority has been appointed by this example.

Pre-publication gates

Check accessible text, image rights and destination behaviour alongside the message. A completed checklist records a review; it does not certify compliance.

CHANNEL MESSAGE / DRAFT COPY

Editorial gate

Meaning is consistent across the three placements.

Product gate

Capability language matches an inspectable artifact.

Rights gate

Use and distribution permissions are checked.

Which unresolved gate should stop publication?

10 / LAUNCH KIT

Learn without inventing a launch result.

CHANNEL REGISTER

email / draft

DELIVERY BOUNDARY

3 proposed placements; no sends or results supplied.

Figure 5 / fictional illustration, not evidence / curated image source in provenance.json

After a real release, compare the observed reader response with the explanation task. Start with what was actually delivered and which destinations were available.

This template has no impressions, sends, clicks or conversions. Record denominators, time windows and consent conditions before reporting rates. Separate a reader’s confusion from a product-quality conclusion.

Review questions, not reported performance

Carry forward the clearest unresolved question. Revise the message when its meaning fails; do not treat an untested headline choice as a measured winner.

CHANNEL MESSAGE / DRAFT COPY

Delivery record

Not supplied; planned copy is not a sent campaign.

Comprehension question

Could readers describe the proposed interaction?

Next revision

Change the smallest confusing part and review again.

What evidence would justify keeping or changing the message?
