01 / SEED ROUND

# Open with a bounded ambition.

## This narrative practises explaining an imagined community venture to a reader. It is a document script, not a real investment offering or a claim that funds have been raised.

The ambition is to investigate a useful shared service. Every claim about demand, delivery and finance remains provisional unless replaced by appropriately sourced information.

## Claim and qualification

Use this section to record a bounded response to the question below. Retain the distinction between the fictional example, your interpretation and any separate evidence a real use would require.

Figure 1 / fictional illustration, not evidence / curated image source in provenance.json

| | |
|---|---|
| **NARRATIVE CLAIM** | What can the opening honestly promise to explore? |
| **QUALIFICATION** | Fictional exercise; no traction or funding supplied |

*What can the opening honestly promise to explore?*

02 / SEED ROUND

# Give the reader a clear route.

## The script follows problem, proposed response, alternatives, evidence gaps, a fictional resource model, risk and the response sought.

Read the script aloud as a writing exercise if useful, but no speaking time is promised. Ten pages are document sections, not a prescribed presentation duration.

## Claim and qualification

Use this section to record a bounded response to the question below. Retain the distinction between the fictional example, your interpretation and any separate evidence a real use would require.

Figure 1 / fictional illustration, not evidence / curated image source in provenance.json

| | |
|---|---|
| **NARRATIVE CLAIM** | Which claim needs qualification before it is spoken? |
| **QUALIFICATION** | Fictional exercise; no traction or funding supplied |

*Which claim needs qualification before it is spoken?*

03 / SEED ROUND

# Name a problem without manufacturing traction.

## The fictional premise is that a local shared service might make a recurring task easier. It does not establish market size, willingness to pay or user demand.

Avoid invented customer counts or testimonials. A strong problem statement can admit that evidence is missing and specify what would need to be learned.

## Claim and qualification

Use this section to record a bounded response to the question below. Retain the distinction between the fictional example, your interpretation and any separate evidence a real use would require.

Figure 2 / fictional illustration, not evidence / curated image source in provenance.json

| | |
|---|---|
| **NARRATIVE CLAIM** | Which source would establish actual demand? |
| **QUALIFICATION** | Fictional exercise; no traction or funding supplied |

*Which source would establish actual demand?*

04 / SEED ROUND

# Explain the proposed response.

## Describe the intended experience in ordinary language before naming features. The imagined service should be understandable without implying that it has been built or tested.

A concept can suggest a useful direction while remaining uncertain. Do not describe a drawing, informal conversation or internal preference as product-market fit.

### Claim and qualification

Use this section to record a bounded response to the question below. Retain the distinction between the fictional example, your interpretation and any separate evidence a real use would require.

Figure 2 / fictional illustration, not evidence / curated image source in provenance.json

| | |
|---|---|
| **NARRATIVE CLAIM** | What remains untested in the response? |
| **QUALIFICATION** | Fictional exercise; no traction or funding supplied |

*What remains untested in the response?*

05 / SEED ROUND

# Keep the alternative visible.

## A responsible narrative acknowledges that people may already address the task in other ways. This exercise supplies no competitor research or verified market comparison.

Discuss the kind of alternative that should be investigated, rather than inventing a ranking. A preferred story is not proof of differentiation.

### Claim and qualification

Use this section to record a bounded response to the question below. Retain the distinction between the fictional example, your interpretation and any separate evidence a real use would require.

Figure 3 / fictional illustration, not evidence / curated image source in provenance.json

| | |
|---|---|
| **NARRATIVE CLAIM** | What real comparison would be relevant? |
| **QUALIFICATION** | Fictional exercise; no traction or funding supplied |

*What real comparison would be relevant?*

06 / SEED ROUND

# Show a transparent fictional resource split.

## Use 100 teaching units only: 40 for exploration, 35 for a bounded pilot question and 25 held as an unresolved reserve. The total is 100.

These are invented units, not currency, an ask, a budget quote or a valuation. No allocation authorises spending or establishes a real funding requirement.

## Claim and qualification

Use this section to record a bounded response to the question below. Retain the distinction between the fictional example, your interpretation and any separate evidence a real use would require.

Figure 3 / fictional illustration, not evidence / curated image source in provenance.json

| TEACHING ALLOCATION | NOT CURRENCY |
|---|---|
| **Exploration / pilot question** | 40 / 35 |
| **Unresolved reserve / TOTAL** | 25 / 100 |

*Which omitted category could change a real resource plan?*

07 / SEED ROUND

# Separate a signal from a result.

## A conversation, an expression of interest or an internal sketch could motivate a next question. None automatically establishes revenue, retention or a funded commitment.

The template supplies no actual traction. A real narrative should state how evidence was obtained, what it measures and what it cannot establish.

## Claim and qualification

Use this section to record a bounded response to the question below. Retain the distinction between the fictional example, your interpretation and any separate evidence a real use would require.

Figure 4 / fictional illustration, not evidence / curated image source in provenance.json

| | |
|---|---|
| **NARRATIVE CLAIM** | What would make a claimed signal verifiable? |
| **QUALIFICATION** | Fictional exercise; no traction or funding supplied |

*What would make a claimed signal verifiable?*

08 / SEED ROUND

# State risk without a decorative disclaimer.

## Relevant unknowns include whether the problem is meaningful, whether a suitable response is feasible and whether responsible delivery arrangements exist.

Risks belong beside the intended next step, not only in tiny print. This writing exercise does not assess legal, financial or operational suitability for a real venture.

### Claim and qualification

Use this section to record a bounded response to the question below. Retain the distinction between the fictional example, your interpretation and any separate evidence a real use would require.

Figure 4 / fictional illustration, not evidence / curated image source in provenance.json

| | |
|---|---|
| **NARRATIVE CLAIM** | Which assumption could invalidate the preferred story? |
| **QUALIFICATION** | Fictional exercise; no traction or funding supplied |

*Which assumption could invalidate the preferred story?*

09 / SEED ROUND

# Ask for the right response.

## The fictional request is for source-aware feedback on the next learning question. It is not a request to purchase securities or transfer money.

Invite the reader to identify missing evidence or a responsible reviewer. Do not imply that a meeting, positive comment or local note is a commitment.

## Claim and qualification

Use this section to record a bounded response to the question below. Retain the distinction between the fictional example, your interpretation and any separate evidence a real use would require.

Figure 5 / fictional illustration, not evidence / curated image source in provenance.json

| | |
|---|---|
| **NARRATIVE CLAIM** | What non-financial response would help clarify the idea? |
| **QUALIFICATION** | Fictional exercise; no traction or funding supplied |

*What non-financial response would help clarify the idea?*

10 / SEED ROUND

# Close without claiming a transaction.

## Summarise the intention, evidence gap and proposed learning question. Keep fictional status visible in any exported script or excerpt.

No round, investor, valuation, contract or funding outcome exists in this example. Replace the content responsibly before considering any real-world use.

## Claim and qualification

Use this section to record a bounded response to the question below. Retain the distinction between the fictional example, your interpretation and any separate evidence a real use would require.

Figure 5 / fictional illustration, not evidence / curated image source in provenance.json

| | |
|---|---|
| **NARRATIVE CLAIM** | Which phrase could accidentally imply secured funding? |
| **QUALIFICATION** | Fictional exercise; no traction or funding supplied |

*Which phrase could accidentally imply secured funding?*
